

Dylan,

I understand that Peter Marlowe is going before the planning board tonight with this project or at least a partial plan. I have expressed concerns to Mr. Marlowe about fire department access to these buildings given the tight proposed road and parking areas. We are also concerned with turns into the actual property as parking on these streets is notoriously bad. I have requested a swept-path analysis for each property which he has yet to provide. I just wanted to make you aware that the LFD has issues with this project as is. Thanks.
